DETAILED ACTION

SUPPLEMENTAL EXAMINER'S AMENDMENT

1. This Examiner's amendment is to substitute the Examiner amendment (Paper # 03/03/2004).
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Oblon/ Mr. Pous on February 24, 2004.

Claims 4-6 and 11-13 stay in the application and are amended as follows: see attachment to the Office action/ Examiner's Amendment.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.

Any inquiry concerning this communication should be directed to the Examiner Verbitsky who can be reached at (571) 272-2253 Monday through Friday 8:00 to 4:00 ET.

Claim 4. (Currently Amended) A method ~~of estimating a temperature~~ according to claim 2, wherein the first object is a stator iron core of an electric motor, wherein the second object is a stator coil of the electric motor, and wherein the step (d) includes a process of determining the temperature increment quantity ΔT in accordance with a specific value substantially indicating the amount of energization of the electric motor from the relation between the predetermined temperature increment quantity ΔT and the specific value substantially indicating the amount of energization of the electric motor.

Claim 5. (Currently Amended) A method ~~of estimating a temperature~~ according to claim 4, wherein the step (c) includes a process of determining the temperature of the stator iron core on the basis of the temperature of a coolant for cooling the stator of the electric motor and the specific value substantially indicating the amount of energization of the electric motor.

Claim 6. (Currently Amended) A method ~~of estimating a temperature~~ according to claim 1, wherein the second object is a stator iron core of an electric motor, wherein the first object is a coolant for cooling the stator of the electric motor, and wherein the step (d) includes a process of determining the temperature of the stator iron core on the basis of the coolant temperature and a specific value substantially indicating the amount of energization of the electric motor.

*attachment to the Examiner's
Amendment 1.*

Claim 11. (Currently Amended) A ~~temperature estimation~~ device according to claim 9, wherein the first object is a stator iron core of an electric motor,
wherein the second object is a stator coil of the electric motor, and
wherein the estimation portion determines the temperature increment quantity ΔT in accordance with a specific value substantially indicating the amount of energization of the electric motor from the relation between the predetermined temperature increment quantity ΔT and the specific value substantially indicating the amount of energization of the electric motor.

Claim 12. (Currently Amended) A ~~temperature estimation~~ device according to claim 11, wherein the temperature determination portion determines the temperature of the stator iron core on the basis of the temperature of a coolant for cooling the stator of the electric motor and the specific value substantially indicating the amount of energization of the electric motor.

Claim 13. (Currently Amended) A ~~temperature estimation~~ device according to claim 8, wherein the second object is a stator iron core of an electric motor,
wherein the first object is a coolant for cooling the stator of the electric motor, and
wherein the estimation portion determines the temperature of the stator iron core on the basis of the coolant temperature and a specific value substantially indicating the amount of energization of the electric motor.
